Ce document statistique présente, pour chacune des trois sous-régions scolaires de Montréal: 1. Les taux de scolarisation observés par âge, âge-niveau et par sexe pour la période comprise entre 1966 et 1972; 2. Une prévision des taux de scolarisation par âge, âge-niveau et sexe de 1974 à 1986. Ces données concernent tous les niveaux d'enseignement, du préscolaire au collégial.

Ce document renvoie, pour les taux de scolarisation de l'ensemble de la région scolaire de Montréal, à l'étude de Dufour et Lavoie: ##La fréquentation scolaire dans la région de Montréal et dans les sous-régions, 1966-1986## (1974).

PRESENTATION

L'importance des clientèles scolaires de la région de Montréal par rapport à celle de l'ensemble du Québec (54% en 1974), est telle, que nous avons jugé utile de publier dans un document isolé, les taux de scolarisation des sous-régions de Montréal(1).

Les sous-régions Nord, Sud et de l'Ile-de-Montréal se caractérisent pa :

- les forts mouvements migratoires internes,
- l'inégale distribution de l'équipement,
- leur pouvoir d'attraction sur la plupart des migrants des autres régions,
- l'importance numérique de chacune des sous-régions.

On trouvera dans ce document statistique pour chacune des trois sous-régions:

a) les taux observés par âge, âge-niveau et par sexe pour la période comprise entre 1966 et 1972.

b) une prévision des taux de scolarisation par âge, âge-niveau et sexe de 1974 à 1986.
